Intro

Peeling the valve cover off to see casting number, valve train

Using a borescope to see block casting number

Removing the first spark plug. The only easy one

Using the freshly crafted tool I made to make this job easier

Starting on the spark plugs on the right. If you thought the other side was difficult, LOL

All Plugs are OUT! They don't look too bad!

Removing the distributor cap and rotor

I'd say this was past its prime.

Coparing new rotor and cap to old rotor and cap. Should make a HUGE difference

Installing new cap and plug wires... uh, some of these won't work with the headers

Fixing vacuum leaks and cleaning the MAF, the 'Right' Way

First attempted start! Family is here to see my failure

It starts so much easier, but it still runs BAD

SERIOUSLY, THATS IT?!

ITS ALIVE...

Oh it seems it idles funny

My brain is computing what my ears are sensing

OH YEAH BABY... someones been here and for once, its a good thing!

Cold start, sorry neighbors!

Changing the oil, which is probably older than I want to know

Removing the ECM and checking for an aftermarket Prom/Chip. Super common back in the day!

Fun for the whole family, except my daughter who is not a fan, yet...
