Ref Cursor is an acronym of Reference to a Cursor.

It is a PL/SQL datatype using which you can declare a special type of variable called Cursor Variable.

A single cursor variable can be associated with multiple SELECT statements in a single PL/SQL block.

A static cursor can only access single SELECT statement at a time.

Cursor Variables and Ref Cursors are two inter-dependent topics

In Oracle Database cursor variables exist in the form of Ref Cursors.

Types of Ref Cursor?

1. Strong Ref Cursors 2. Weak Ref Cursors.

Strong Ref Cursor?

TYPE ref_cursor_name IS REF CURSOR RETURN (return type)

Weak Ref Cursor?

Sys_RefCursor
