Stripped

In this stunning follow-up to Brian Freeman's remarkable debut novel, *Immoral*, Detective Jonathan Stride discovers that there are only two ways to go in Las Vegas. You can hit the jackpot. Or you can get Stripped... They looked like isolated cases: a hit-and-run and a celebrity murdered during a fling with a prostitute. No one could ever imagine they'd be linked to a brutal crime in Las Vegas's steamy past—and that the race against the clock to corner a determined serial killer would stir up secrets long thought buried with the dead. As detectives Jonathan Stride and Serena Dial are called separately to investigate, they have no idea what they're stepping into: a world where desperate ambition rules and loyalties know no bounds, and where their own uncharted emotions and sexual desires will reach an explosive conclusion. Shocking, twisted, with edge-of-your-seat suspense, *Stripped* pushes the limits of its heroes and keeps the reader turning every page until the last plot twist.

Stripped

Stripped examines the ways in which erotic bodies communicate in performance and as cultural figures. Focusing on symbols independent of language, Maggie M. Werner explores the signs and signals of erotic dance, audience responses to these codes, and how this exchange creates embodied rhetoric. Informed by her own ethnographic research conducted in strip clubs and theaters, Werner analyzes the movement, dress, and

cosmetic choices of topless dancers and neo-burlesque performers. Drawing on critical methods of analysis, she develops approaches for interpreting embodied erotic rhetoric and the marginal cultural practices that construct women's public erotic bodies. She follows these bodies out into the streets—into the protest spaces where sex workers and anti-rape activists challenge discourses about morality and victimhood and struggle to remake their own identities. Throughout, Werner showcases the voices of these performers and in the analyses shares her experiences as an audience member, interviewer, and paying customer. The result is a uniquely personal and erudite study that advances conversations about women's agency and erotic performance, moving beyond the binary that views the erotic body as either oppressed or empowered. Theoretically sophisticated and delightfully intimate, *Stripped* is an important contribution to the study of the rhetoric of the body and to rhetorical and performance studies more broadly.

Cancer—that unfair, indiscriminate, devastating disease—affects everyone at some point, whether a family member, a friend, or ourselves. It is a life-altering event of seismic proportions that forever impacts the landscape of our lives and, with raw force, pushes us to reorder priorities, reassess values, and perhaps rethink our faith. A diagnosed tumor forced Heather King to this crisis of mortality, to live at the crossroads of uncertainty, belief, fear, culture, and modern medicine. Only her faith in Christ, the Great Physician, helped her sort through the crippling uncertainty and choose her best way forward. *Stripped* is a heartfelt expression of profound Catholic faith in the face of a cancer diagnosis. It chronicles King's informed decision not to blindly declare "war on her cancer" but to carefully examine all the medical evidence available and to choose to bring God into her decision making, even if that meant going against established medical advice. The story of *Stripped* demonstrates how King's medical and spiritual journey led her to a place of freedom in Christ, where she could make an informed and faith-filled decision about her course of treatment and ultimately, accept her vulnerability. King learned, as we all must, that healing means so much more than simply "getting well."

This is a wonderful comic novel, about philosophy, the nature of art, the beauty of the ordinary, and about quirky, complete, night & day victims of obsessive-compulsive disorder. Two charming, over-anxious, germ-phobic friends, Isaac and Greg take a road trip from Boston to Philadelphia. They are both obsessed with Marcel Duchamp, his art and his ideas, and thus the destination has to be the largest collection of Duchamp in the world, The Philadelphia Art Museum, the actual place "The Bride Stripped Bare by Her Bachelors, Even" was to be delivered when it was cracked and broken in shipment. The piece is sometimes known as The Large Glass, and today it sits in the middle of a large gallery proudly displayed in its broken state which Duchamp repaired and then certified had been his intention all along. The two men are driven in a rented disinfected Winnebago by Kelly, a beautiful art scholar who smells like a mixture of lemons and fresh sawdust. They intend to pick up an ancient chocolate grinder, an exact working sculptural copy of one used in a Duchamp painting. Isaac intends to grind his own pure chocolate, which will prevent the build-up or arterial plaque, because his mother died of a stroke. Every action has its own suitable reaction, and then

some. Isaac hopes eventually to overcome his devotion to his many obsessions and to re-enter the world, evidently his version of the real world. He is not an unreliable narrator, he is a hyper-reliable narrator, consumed by his own attention and thrilled with the connections he sees everywhere all at once. Of course when he finally gets to the museum he must dress-up as a woman to visit the collection.

Robert Lebel, French art critic and collector, was instrumental in rendering Marcel Duchamp's often hermetic life, art, and ideas accessible to a wider public across Europe and the United States, principally with his 1959 publication *Sur Marcel Duchamp*, the first monograph and catalogue raisonné devoted to the artist. Duchamp was a willing partner in the book's creation. In fact, his active participation in both its conception and layout was so substantial that the book is considered part of the artist's oeuvre. But the project took six years to complete. The trials, tribulations, quarrels, and machinations that plagued the production,

publication, and publicity of Sur Marcel Duchamp are the focus of this correspondence between two lifelong friends. Translated and printed in full together for the first time, and including the original French texts, these letters, postcards, and telegrams from the collection of the Getty Research Institute offer uncensored access to the evolution of the relationship between Lebel and Duchamp from December 1946 to April 1967. They provide valuable information about their daily activities as well as those of friends and colleagues, vital details concerning their various collective projects, and illuminating insights into their thinking about art and life. These documents, witty and sincere, bear witness to the art of friendship and a friendship in art.

Materials selection and microstructural design of the sensing part of flexible pressure sensors are of great significance in improving their performance. However, achieving synergy between the sensing material and the microstructure of the flexible sensors remains a challenge. Herein, compressible and stretchable sensors based on a carbon nanofiber/poly(styrene-butadiene-styrene) (CNF/SBS) compound are demonstrated with a template-stripped method for detecting various human motions, including pulses, finger bending and pressure distributions. Benefiting from the adjustable fingerprint microstructure and mass fraction of CNFs, the as-designed flexible pressure sensor dramatically achieves a high sensitivity of 769.2 kPa⁻¹, a low detection limit of 5 Pa and high reliability of over 1000 cycles. Moreover, the flexible sensor based on CNF/SBS can be stretched due to the outstanding tensile properties of SBS. The enhanced stretchable sensor remarkably possesses a high gauge factor of 105.6 with a stretch range of 0%-300% and up to 600% elongation. Importantly, the proposed pressure and tension strain sensors are investigated to monitor vigorous human motion, revealing their tremendous potential for applications in flexible compressible and stretchable wearable electronics.

Bruce Herschensohn challenges the same old beliefs most often heard in the media and read in the textbooks. Is Afghanistan really the longest war in the history of the United States? Was Hong Kong given back to the People's Republic of China in 1997 because of the lease signed by Great Britain in 1898? Herschensohn convinces us with evidence that the answer to both questions is no. The book covers a wide range of controversial issues in domestic as well as international politics from US president's constitutional rights to the Israeli-Palestinian Authority peace process. As you read on, you will realize sooner or later that you have been put into a "coma" by the media. This book is a call to start, reconsidering, questioning, and digging deeper into what the media feeds the public. Lucid, succinct, abundant in historical evidence, and easy to read, this book will draw general readers interested in contemporary politics as well as scholars and students of history and politics. But perhaps most important, it will win the applause of the people who like to engage in true critical thinking.

From bogan to boned and beyond -- a full-frontal 'femoir' by one of Australia's best-loved journalists From bogan to boned and beyond – a full-frontal femoir Tracey Spicer was always the good girl. Inspired by Jana Wendt, this bogan from the Brisbane backwaters waded through the 'cruel and shallow money trench' of television to land a dream role: national news anchor for a commercial network. But the journalist found that, for women, TV was less about news and more about helmet hair, masses of makeup and fatuous fashion, in an era when bosses told you to 'stick your tits out', 'lose two inches off your arse', and 'quit before you're too long in the tooth'. Still, Tracey plastered on a smile and did what she was told. But when she was sacked by email after having a baby, this good girl turned 'bad', taking legal action against the network for pregnancy discrimination. In this frank and funny 'femoir' - part memoir, part manifesto - Tracey 'sheconstructs' the structural barriers facing women in the workplace and encourages us all to shake off the shackles of the good girl. *"Glows with the wisdom of a woman who has learned essential truths about love, life and happiness"* - Caroline Overington *"Wickedly witty and wonderfully wise"* - Wendy Harmer *"Fiercely smart and ferociously funny"* - Benjamin Law

Is lap dancing harmless fun, providing entertainment for men and well-paid, self-empowering work for women? The lap dancing industry has long argued that it offers an everyday service within free market guidelines, but in 2010 the UK government legislated that lap dancing venues in the UK should be classed as 'sex establishments'. So, are lap dancers sex workers rather than exotic dancers? What attracts so many women to work within the industry? Are women being sexually exploited and their bodies used as objects for male gratification? Media depictions of lap dancers often fall prey to caricatured and stereotypical images. Having worked as a lap dancer herself, Jennifer Hayashi Danns knows about the industry from direct experience. In *Stripped* she tells her story, and gives a voice to many others who have either worked in the clubs or been directly affected by what goes on in them. In sometimes raw, direct language, the various contributors express their knowledge of the lap dancing industry and the impact it has had on their lives. These compelling narratives give dramatic perspectives into a secretive and largely undisclosed world, peeling away some of the gloss on the surface, and revealing the often seedy and desperate reality of the lap dancing industry. The second part of the book offers insightful commentary, analysis and solutions.

A lavishly illustrated compendium of the art and history of animal anatomy from antiquity to today. For more than two thousand years, comparative anatomy—the study of anatomical variation among different animal species—has been used to make arguments in natural philosophy, reinforce religious dogma, and remind us of our own mortality. This stunningly illustrated compendium traces the intertwined intellectual and artistic histories of comparative anatomy from antiquity to today. *Stripped Bare* brings together some of the most arresting images ever produced, from the earliest studies of animal form to the technicolor art of computer-generated anatomies. David Bainbridge draws on representative illustrations from different eras to discuss the philosophical, scientific, and artistic milieus from which they emerged. He vividly describes the unique aesthetics of each phase of anatomical endeavor, providing new insights into the exquisite anatomical drawings of Leonardo and Albrecht Dürer in the era before printing, Jean Héroard's cutting and cataloging of the horse during the age of Louis XIII, the exotic pictorial menageries of the Comte de Buffon in the eighteenth century, anatomical illustrations from Charles Darwin's voyages, the lavish symmetries of Ernst Haeckel's prints, and much, much more. Featuring a wealth of breathtaking color illustrations throughout, *Stripped Bare* is a panoramic tour of the intricacies of vertebrate life as well as an expansive history of the peculiar and beautiful ways humans have attempted to study and understand the natural world.

Israel: *Stripped Bare* is a book about the brutal reality of Israel's existence, written from a perspective of an Arab-Jew. Some of these articles were already published in *Sephardic Heritage Update*, and some have been added over the years. It becomes crucial to see Israel's existence through the eyes of the Levantine prison, outside of the European perspective of the Jewish State. The book provokes serious ideas and thoughts concerning the future relationship between Arabs and Jews in the Middle East and the possible contribution of Jews born in Arab and Muslim countries to the future cultural symbiosis of this historical crossroads.
