Origin of life from nonliving matter. 14 Minuten, 29 Sekunden - Despite the incredible variations of life we see today, at the fundamental level, all living things contain three elements: Nucleic ...

Evolution is process of development and diversification of living things from earlier living things

Evolution does not say anything about how life originated

Complex bacteria of today almost certainly arose from much simpler life forms in incremental steps

All living things are distinguished by their ability to capture energy and convert it to heat

Location affects how languages sound?

Language is complex and difficult, even for babies. Does that mean it must be prewired? Or could we have invented it?

If language \"evolved,\" what were the steps it took? [Enter indexes]
